

ADSC

Dynamic operational status*

Aloha clients of the Agricultural Diagnostic Service Center,

Due to COVID-19 safety restrictions by UH, state and counties, ADSC services are still available but have different routes, depending on the location and operational status.

The following information can help guide you in submitting samples. As the situation evolves daily, the information below may also change. Mahalo nui for your flexibility and patience during this pandemic.

The University of Hawai'i is currently [closed to the public](#). Therefore, access to the ADSC for testing services is restricted.

However, if you are able to follow these Covid-19 precautionary instructions and measures explicitly, you may submit samples to our facility:

- Please download and use the mobile application [Lumisight](#) before you arrive at our facility to drop off samples. You must select the visitor's option if you are not a faculty, staff or student at the University of Hawai'i at Manoa.
- If you answer 'yes' to any question on the Lumisight application, DO NOT enter the UH Manoa campus and the ADSC facility. We will ask you to show us the Check-In-History results on the Lumisight app upon arrival at our service window to verify your status. In an abundance of caution and human health safety, the ADSC will refuse service if you do not use the Lumisight application.
- There is no temperature check, however, we will ask you to use the automated hand sanitizer dispenser before starting the transaction, and to leave the samples and completed forms on the countertop.
- Masks must be worn at all times while at our facility and you must adhere to all University of Hawai'i [personal safety practices](#).

* as of November 11, 2020
